

E-commerce Product Page Project Documentation

Project Objectives

- The primary goal of the E-commerce Product Page project is to design and implement a single-product web page, focusing on clean and effective web design using HTML and CSS.

The specific objectives include:

HTML Structure:

1. Build a well-organized HTML structure for the E-commerce Product Page.
2. Include essential elements such as headers, paragraphs, images, and links.

CSS Styling:

1. Implement CSS to style the page layout for a visually appealing design.
2. Pay attention to color schemes, fonts, and spacing for a cohesive and professional appearance.

Responsive Design:

1. Ensure the page is responsive to different screen sizes using media queries.

Interactive Elements:

1. Incorporate interactive elements, such as hover effects or transitions, to enhance the user experience.

Product Information:

1. Display relevant information about the product, including its name, description, and price.

Product Image:

1. Include a high-quality image of the product to give users a clear visual representation.

Conclusion:

The project emphasizes creating an engaging and visually appealing product page that adapts to different devices while providing essential information about the featured product.
